Features offered by our popular netcafe solutions

	Dynasoft Cybercafe SurfShop Pro	Dynasoft Cybercafe SurfShop Free
- Standard features -		
Up to 100 different skins for your server and client program and unlimited design capability for all program screens.	Yes	No
Up to 250 PCs configurable.	Yes	Limited to 20
20 blocking and security options for all client PCs to make the ownership of your Cyber Cafe a safe and trouble free one.	Yes	Limited to four main groups
Choice of four charging systems for your customers: Set fee, decreasing cost, single fee or fixed rate.	Yes	Yes
On-the-spot prepay and postpay billing or sell prepaid accounts through the use of a login and password or a single pin code to your customers.	Yes	Yes
Canteen (POS): get your customers to order drinks and food directly through our Internet cafe client software. An inventory is kept of all items in the canteen and a warning is given when you are running low on certain items	Yes	Yes
Customised screensaver to personalise the computers of your Cybercafe. This can also enable you to run your own banner ads and adverts to advertise activities in your local community or make extra money by advertising local businesses.	Yes	No
Our Internet cafe software is fully crash-tolerant preventing all loss of session duration and cost.	Yes	Yes
Server access with different levels of clearance rights: owner, administrator, operator. Each one of the 15 access rights can be set individually.	Yes	Limited to three main admin types
View the URL being accessed by each user.	Yes	Yes

Stop, print a receipt, lock or pause and resume user sessions at any time.	Yes	Yes
View the screen area of each client PC from the server.	Yes	No
Reboot or shut down each PC individually or the entire cafe in one click.	Yes	Yes
Send messages to each user in session.	Yes	Yes
Multilingual server and client interfaces (French, English, Spanish, Portuguese, Italian, German, Russian & Dutch).	Yes	Yes
Wake on Lan	Yes	No
No special programs or plug-ins to be installed with the program.	Yes	No
Automatic live-update built in (valid for minor updates).	Yes	Yes
Compatible with Windows 32 and 64 bit.	Yes	Yes
- Powerful security features you only get with our Internet cafe software -		
All personal data is wiped clean between sessions: including passwords, login names, auto-complete entries, temporary Internet files, and all user account data for MS, Yahoo, AOL, ICQ messenger programs and Skype.	Yes	Yes
Manage all the downloads users make and block certain files according to the file extension. Allow the other files to be saved in four preset locations.	Yes	No
All network data is encrypted.	Yes	Yes
Only customers can modify or see their account user password.	Yes	Yes
Don't loose any sleep over a system crash. We will send you a copy of your database by email so you can be up and running fast.	Yes	Yes
Our Internet cafe software does not corrupt your PCs: uninstall the program easily, install all Internet utilities you will ever need, back up all critical data and roll-back all blocking options on each PC to its original state, all using our special Installer program.	Yes	Yes

Your database is compacted and optimized every 5 days automatically.	Yes	Yes
Free 30-day support when you purchase you copy from our Website.	Yes	No
- Ease of use -		
Simply use it as if you were using a VCR by starting, stopping and resetting sessions at the click of a mouse. Access to all 250 PCs is done in 2 clicks or fewer. An important advantage of our Internet cafe software is its simple interface. It is devoid of useless 'value added' features that bloat software, make it hard to work with, difficult to learn and slow it down.	Yes	Yes
Blocking options and client configuration are set centrally from the server. This will save you running round your Cafe trying to change configurations of blocking options, passwords or customisable features on each PC.	Yes	Yes
Install our Internet cafe software on all versions of MS Windows, from Windows 95/NT to 7 and Server 2008, on any PC machine, under a Windows power or administrator account, alongside most other software, and regardless how the Internet connection is shared (MS ICS, NAT, Routers...) or accessed (modem, broadband,...), all in minutes.	Yes	Yes
Full graphical statistics and sales reporting either via the program itself or via e-mail, using our stand-alone secure DB viewer.	Yes	Gross sales only
Internet or dongle-based licensing systems available. The first one requires a permanent connection to the Internet; the second one does not for those who don’t have such connection in their cybercafe.		
Our Internet cafe pro software was especially designed for speed and is much faster than the Free version.	Yes	No
- Make more money with your centre -		

Differentiate between four groups of programs: Internet, Games, Multimedia and Office and set different rates for each one! Limit access to each group whether by PC number or by customer.	Yes	No
Licence management of software keys: Only purchase those program licences you really need for your centre and let our Internet cafe software handle the swapping of licences between PCs.	Yes	No
Track all types of stations not just PCs but also the following: GameCube, Playstation, X-Box, Apple, wi-fi machines, Dreamcast,...	Yes	No
Print manager: get your customers to print from their PCs and track all black ink or colour pages printed into a single bill that aggregates all costs: Internet sessions, print jobs and orders from the canteen. Differentiate costs for black ink or colour pages.	Yes	Yes
Turn your cybercafe into a training centre: network chat, whiteboard and display of the server's desktop area on all client PCs so the teacher can show to his pupils what he is doing on the server PC.	Yes	No
Customer codes can be generated and printed in batches to increase customer fidelity and facilitate the issuing of customer accounts.	Yes	No
Our Internet cafe software monitors all bandwidth usage across your network and can be configured so this usage is charged if required.	Yes	No
- Be more in control -		
In account or pre-pay mode, all sessions clock down and PCs lock up when they hit zero. A warning is flagged up to users two minutes before sessions end.	Yes	Yes
Customers can top up their account while in session, or change PC.	Yes	Yes
Sales taxes fully supported.	Yes	Yes
Import any existing list of customers directly into our Internet cafe software.	Yes	Yes

Receipts can be issued to your customers no matter the connection mode used by them.	Yes	Yes
Over 70 program events and actions are logged for extra safety. This includes all sessions, sales from the POS and all actions by operators and customers.	Yes	Yes
Many countries around the world require that cybercafe owners keep information about all customers who walk into their centres, this includes a log of URL's visited, name and address of the user. Our Internet cafe software supports this and makes it easy to keep, save and print and generally manage this data.	Yes	Yes
Configure happy hour schedules easily.	Yes	No
Very competitively priced.	See	Free
